We are looking to expand our team and are hiring:

Senior AI Training Expert (m/f/d)
for the European AI Factory *HammerHAI*

Your Role and Responsibilities:

- Developing and planning the AI Factory's (AIF) portfolio of training offers within a friendly and open work environment in a highly motivated, international team
- Leading the design and organisation of training events and series, collaborating with and coordinating other trainers
- Ability and willingness to contribute with your knowledge to training (and consultancy) offers for the targeted user groups
- Analysing the requirements and needs of targeted user groups with respect to training (and consulting)
- Coordinating and organizing the corresponding work package of the AIF
- Fostering contact with collaboration partners as well as stakeholders from the European AI ecosystem, relying on your friendly personality and communication skills
- Supporting AI talent development in Europe and Germany by means of training and consulting within the AIF's ecosystem
- Opportunities to work with national and European partners on novel AI projects from private and academic sectors
- Maintaining relationships with technology providers and system developers (hardware/software)

Qualifications:

Required/Minimum Qualifications

- PhD or Master's degree in computer or data science, or other areas of scientific computing with at least 3 years of applied data analytics and machine learning/AI experience as senior engineer/data analyst in research or enterprise environments

Other Requirements

- Proficiency working in Linux environments
- Extensive knowledge about and practical skills applying Machine Learning/AI applications, frameworks, methods and models (e.g. Python, PyTorch, JAX, etc.)
- Willingness to keep up with current developments and to learn new technologies
- Knowledge and experience designing and organising training events and series as well as conducting your own training events
- Excellent English and preferably German presentation and writing skills

Preferred Qualifications:

- Familiarity with Git-based version control systems like GitLab or GitHub
- Customer relationship management know-how
- Experience working at or with start-ups/small and medium-sized enterprises (SMEs)

Area	Big Data and Artificial Intelligence
Working time	full time (40 hrs) / part-time possible flexible working model with electronic time recording
Term of the contract	End of Q1/2028, a further employment is intended
Remuneration	up to E 13, see [Entgelttabelle TV-L](#)
Annual leave / compensatory time off	30 days (24.12. + 31.12. additionally day off) Overtime is compensated by additional time off
Further trainings	Individual support for in-service training and further education
Mobile work	up to 60% of work time, when applicable
Benefits	e.g. bus and subway (U6) on the doorstep, free parking, pension plan of the Versorgungsanstalt des Bundes und der Länder (VBL), state-of-the-art work equipment

What can you find with us?

Are you looking for a multifaceted and intellectually stimulating position in a dynamic, cooperative and innovative work environment? Then LRZ is the place to be for you! Here at LRZ a collegial, appreciative work environment meets an international crowd of experts who work together to advance IT services for ground-breaking research. We offer flexible work schemes for an optimal work-life balance. Our staff values their creative leeway. As an institute of the Bavarian Academy of Science and Humanities we offer all the benefits of public service. And of course, no wishes remain unfulfilled at the LRZ in terms of technical equipment. We share experiences, constantly review and improve our processes, and are proud that our service-quality and data-security are regularly certified and rated highly.

We actively promote diversity and welcome applications from talented individuals, regardless of cultural background, nationality, ethnicity, gender and sexual identity, physical abilities, religion and age. We give priority to applications from people with disabilities who are equally qualified (SGB IX).

The LRZ in a nutshell:

Since 1962, Bavarian universities and research institutions have relied on the IT expertise of the Leibniz Supercomputing Centre of the Bavarian Academy of Sciences and Humanities. When it comes to the digital transformation of science, we are traditionally ahead of the game.

We are looking forward to receiving your complete application documents (including cover letter, CV and certificates) in a PDF file (other file types are not accepted) by latest **14.08.2025**.
